Which of the following is not one of the benefits of a fact-checking platform adhering to the "Code of Principles", which consists of the criteria for becoming an International Fact-Checking Network signatory?

- a) Increasing the number of fact-checks
- b) Accountability
- c) Quality
- d) Consistency
- e) Transparency

Challenge

How can algorithms contribute to the creation of filter bubbles?

- a) By ensuring a diverse range of content is always presented
- b) By limiting exposure to content that challenges a user's existing beliefs
- c) By randomly selecting content for each user
- d) By promoting only the most factual and unbiased news
- e) By eliminating all personal data from the filtering process

Which of the following is personalisation that is done to users, sometimes with algorithms and sometimes without their knowledge?

- a) Customization
- b) Pre-selected personalisation
- c) Self-selected personalisation
- d) Selection bias
- e) Gatekeeper

"It is a process that compares a published and publicly available claim against reliable and original sources, focusing also on the logic, coherence and context of the claim." Which of the following does this statement describe?

- a) Filtering
- b) Fact-checking
- c) Personalization
- d) Confirmation bias
- e) Information disorder

Which of the following is verifiable?

- a) Emotions
- b) Authenticity of the source
- c) Personal thoughts
- d) Personal ideas
- e) Personal opinions

Which of the following is not one of the elements that can be analyzed about the content of a video?

a) Where the video was taken

b) Who uploaded the video

c) When the event in the video took place

d) Weather at the time of the event in the video

e) Location information in the video

Which of the following usernames raises suspicion that the account to which it belongs may be a bot account?

- a) John\_Coloney
- b) Peter47568432
- c) roseLou
- d) louise12may
- e) MaryJohn

How do fact-checking platforms establish their credibility?

- a) By showing loyalty to specific political parties
- b) By ensuring their fact-checks are free from partisanship and based on verifiable facts
- c) By selectively reporting facts that support their own narratives
- d) By avoiding the publication of any controversial topics
- e) By engaging in advocacy and promotional activities

Challenge

"Because they can perform various operations at a lower cost and with greater efficiency than human effort, they can now be used to assist and sometimes completely replace human intervention in decision-making tasks."

Which of the following concepts does this definition belong to?

- a) Websites
- b) Fact-checking platforms
- c) Algorithms
- d) Search engines
- e) Wikipedia

How do algorithms influence news consumption on social media platforms?

- a) Prevent biased articles from being shown
- b) Ensure every user sees every available news item
- c) Prioritize news that aligns with a user's past behavior
- d) Randomly select news items to show to user
- e) Display company-owned news

What is the impact of algorithms on society?

a) No impact

b) Boost entertainment

c) Drive major changes by influencing information access

d) Reduce data

e) Ensure fairness in all forms of media

What measures can be taken to mitigate the negative impacts of filter bubbles created by algorithms?

- a) Ignoring the existence of algorithms
- b) Increasing the amount of data algorithms can access
- c) Using a variety of search tools and sources to obtain information
- d) Relying solely on one algorithm for all information needs
- e) Avoiding the use of any digital platforms that utilize algorithms

What are the effects of personalization and filtering of information?

- a) Reduced data
- b) Ensures unbiased content
- c) Narrowed range of information
- d) Standardized information
- e) There is no noticeable impact

Which of the following is not one of the methods users can use to bypass filter bubbles?

- a) Utilize multiple sources when searching for information
- b) Being objective
- c) Transparently presenting how filters are applied
- d) Deleting or blocking browser cookies in use
- e) Use ad-blocking browser extensions

If a foreign language is used on a street sign when verifying a location, which of the following tools can be used to understand the detail written on the sign?

- a) TinEye
- b) Google Images
- c) Google Translate
- d) Google Street View
- e) Google Maps

Which of the following can be used to get information about a person's identity as well as to see their professional business contacts?

a) Instagram

b) Namechk

c) LinkedIn

d) InVID

e) Face++

What is the main goal of fact-checking platforms?

- a) To support the political candidates they favor
- b) To provide entertainment and light news to the public
- c) To increase public knowledge by verifying facts in public statements
- d) To censor political content that is harmful to society
- e) To create and spread propaganda that aligns with their views

Which of the following is not one of the criteria for a fact-checking platform to become an International Fact-Checking Network signatory?

- a) Impartiality and fairness
- b) Transparency of resources
- c) Obligation for financial support
- d) Transparency of methodology
- e) An open and honest correction policy

Which of the following tools can be used for automated fact-checking?

- a) Google Analytics
- b) Facebook Insights
- c) Squash and ClaimBuster
- d) TinEye
- e) Adobe Premier

Challenge

Which of the following is the explanation for the situation in the news media where beliefs are reinforced through repetitive communication within a closed system, where people encounter information that reinforces their existing beliefs and views?

- a) Filter bubble
- b) Confirmation bias
- c) Backfire effect
- d) Echo chamber
- e) Manipulation

Which of the following is not verifiable?

a) Authenticity of the source

b) Originality of content

c) When the content was produced

d) Personal ideas

e) Where the content was created

Which of the following is not among the details to look for when investigating the authenticity of a social media account?

a) Username

b) Profile photo

c) Identity of the person/account

d) Which country the person is a citizen of

e) Other related social media accounts

Under which organization was the International Fact-Checking Network launched?

- a) International Association of Journalists
- b) First Draft
- c) Snopes
- d) Poynter
- e) Reuters

Which of the following is not one of the points where automation is used as a facilitator to empower fact-checkers?

- a) Identifying the most important events of the day on a daily basis for fact-checking follow-up
- b) Tracking the most important events of the day on a daily basis for fact-checking
- c) Situations where information that has already been determined to be incorrect is repeated
- d) Checking whether the fact-checkers receive financial support
- e) Close monitoring of content with real-time control

Challenge

Which of the following is one of the methods platforms can implement to bypass filter bubbles?

- a) Utilizing more than one source when searching for information
- b) Using a browser that focuses on privacy
- c) Deleting or blocking browser cookies in use
- d) Use ad-blocking browser extensions
- e) Transparently presenting how filters are applied

Which of the following is not among the features to look for when verifying a website?

a) When the website was created

b) Who manages the website

c) Whether there are links to social media accounts associated with the website

d) Authenticity of the content presented on the website

e) How many different people visited the website

Which of the following is not one of the criteria for a fact-checking platform to become an International Fact-Checking Network signatory?

- a) Do not take a political stance on the issues they verify
- b) Share the professional background of the people working in the organization with readers
- c) Be transparent about why and how they fact-check
- d) Encourage readers to submit claims that need fact-checking
- e) No obligation to share corrected content with readers
